

Time use surveys

Modernizing Time use surveys, in line with ICATUS2016

Francesca Grum
Chief, Social and Gender Statistics Section
United Nations Statistics Division

Introduction

We use time-use data

/energy

Etc.

- Costly
 - High respondents' burden
 - Low response rates
 - Not fully utilized
- Quality
 of life
 Unpaid
 work

 Gender

 Leisure
 Care
 Paid
 work

 Environment

 Health

 How can we produce time-use data more efficiently?

Travel

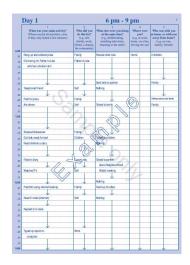

INSTRUMENTS

Snapshot of instruments used by countries

Since 2000, out of around 100 countries, 88 countries collected data as follows:

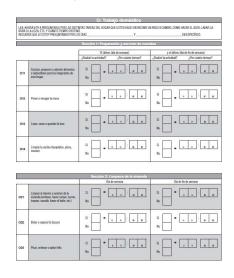

Full time diary: 57

Light time diary: 9

Questions:22

Time use instruments requirements

I N P U T S

	Full diary	Light diary	Questions
Cost	+	-	-
Processing data	+	-	
Respondents' requirements	+	+/-	-

U T P U T

Data quality	+	+	
Data granularity	+	-	
Data usability	+	-	

Time use instruments

How can we optimize:

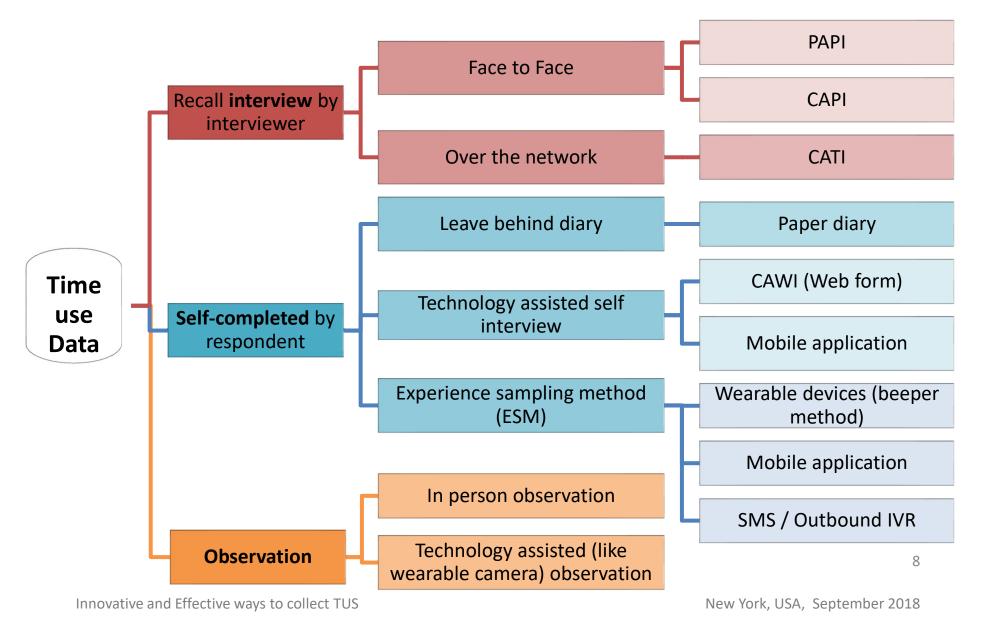

- Reduce inputs
- Keep high outputs

Data collection MODES

Classifying TUS data collection modes

Mixed mode – It's a strategy

 Mixed-mode in data collection try to combine the best of all possible worlds by exploiting the advantages of different modes and compensate for their weaknesses at an affordable cost(De Leeuw 2005).

Advantages

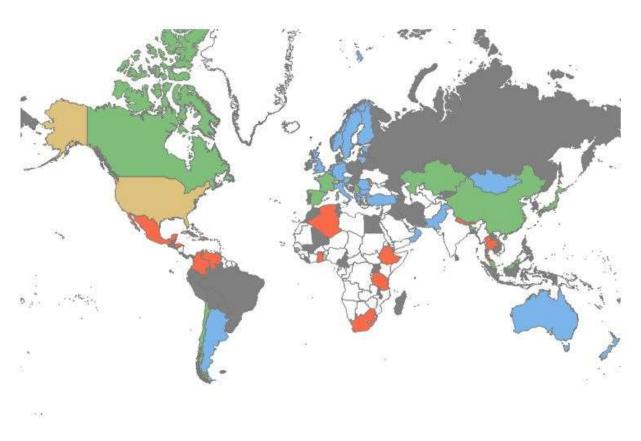

- Improve response rate, overall coverage, data quality
- Reduce cost, time

Limitations

- Mode effect? (different way respondents may answer same question across mode)
- Need to test data integration from multiple modes
